

Breakdown of project fund spend by country

Brazil

Strategic Programme Fund (SPF)

FY 2009/10

1. Project Title: Biofuels adviser for Brasilia.

Project Partner: Amigos da Terra (Friends of the Earth).

Budget: £37,830

2. Project Title: Brazil Climate Change Plan

Project Purpose: To support climate change public policies in partnership with the Brazilian Forum on Climate Change (FBMC)*

Project Partner: British Embassy Brasilia.

Budget: £ 20,000

3. Project Title: CDM (Clean Development Mechanism) Forestry Programme for agriculture and livestock co-operatives in Brazil.

Project Purpose: Implementing CDM Forestry projects in the Mata Atlantica (tropical rain forest).

Project Partner: Brazilian Cooperative Organization.

Budget: £65,443

4. Project Title: CSR (Corporate Social Responsibility) & Large Extractive Industries.

Project Purpose: To establish responsible business practice as the cornerstone of a sustainable development business programme for the Atlantic Rainforest Corridor.

Project Partner: Pro-Natura International.

Budget: £89,000

5. Project Title: Dangerous Climate Change in Brazil.

Project Purpose: To build capacity for state-of-the-art climate change prediction in Brazil, raise awareness among key stakeholders, such as research scientists and policy makers, about the effects of climate change in Brazil, empowering them with scientific evidence.

Project Partner: Hadley Centre and CPTec (Centre for Weather Forecast and Climate Studies).

Budget: £117,190

6. Project Title: Increasing compliance with environmental legislation to reduce deforestation in the Brazilian Amazon.

Project Purpose: To reduce illegal deforestation through promoting compliance with environmental legislation (Brazil's Forest Code).

Project Partner: The Nature Conservancy.

Budget: £56,000

7. Project Title: Reducing carbon emissions from forest fires and deforestation in the Brazilian Amazon.

Project Purpose: To establish and implement forest fire management policy by the (large) rural community in the Brazilian Amazon.

Project Partner: IPAM (Amazon Environmental Research Institute).

Budget: £96,169

8. Project Title: Sustainable construction: policies towards climate security in South America.

Project Purpose: To support local governments in South America to develop policies and action plans to encourage low carbon technologies and energy efficiency in the construction and buildings sector.

Project Partner: ICLEI (Local Governments for Sustainability).

Budget: £126,340

9. Project Title: Sustainable criteria for biofuels production.

Project Purpose: To support production of and investment in a framework for environmental and social criteria for biofuels production in Brazil, through broad stakeholder engagement and an evidence-based approach that demonstrates the benefits of adopting such criteria for the government and private sector.

Project Partner: Amigos da Terra (Friends of the Earth)

Budget: £ 37,830

10. Project Title: Working through businesses to tackle climate change.

Project Purpose: To build the capacity of businesses in Brazil to identify, measure and manage their main sources of green house gas emissions by establishing a national programme of green house gas accounting and reporting.

Project Partner: FGV - Getúlio Vargas Foundation.

Budget: £119,315

Total: £765,117

FY 2010/11

1. Project Title: CSR & Large Extractive Industries.

Project Purpose: To establish responsible business practice as the cornerstone of a sustainable development business program for the Atlantic Rainforest Corridor.

Project Partner: Pro-Natura International (PNI).

Budget: £17,000

2. Project Title: Dangerous Climate Change in Brazil.

Project Purpose: Build capacity for state-of-the-art climate change prediction in Brazil, raise awareness among key stakeholders, such as research scientists and policy makers, about the effects of climate change in Brazil, empowering them with scientific evidence.

Project Partner: Hadley Centre and CPTEC (Centre for Weather Forecast and Climate Studies).

Budget: £ 8,000

3. Project Title: Reducing carbon emissions from forest fires and deforestation in the Brazilian Amazon.

Project Purpose: To establish and implement forest fire management policy by the (large) rural community in the Brazilian Amazon.

Project Partner: IPAM (Amazon Environmental Research Institute).

Budget: £133,034

4. Project Title: Sao Paulo Greenhouse gas inventory.

Project Purpose: Create a strategy for better estimation of greenhouse gas emission.

Project Partner: CETESB - São Paulo State Environment Company).

Budget: £ 130,000

5. Project Title: Sustainable construction: policies towards climate security in South America.

Project Purpose: To support local governments in South America to develop policies and action plans to encourage low carbon technologies and energy efficiency in the construction and buildings sector.

Project Partner: ICLEI (Local Governments for Sustainability).

Budget: £68,497

6. Project Title: Sustainable criteria for biofuels production.

Project Purpose: To support production of and investment in a framework for environmental and social criteria for biofuels production

Project Partner: Amigos da Terra (Friends of the Earth)

Budget: £10,268

7. Project Title: Working through businesses to tackle climate change.

Project Purpose: To build the capacity of businesses in Brazil to identify, measure and manage their main sources of green house gas emissions by establishing a national programme of green house gas accounting and reporting.

Project Partner: FGV - Getúlio Vargas Foundation.

Budget: £15,000

Total: £381,799

Bilateral Programme Budget (BPB)

FY 2009/10

1. Project Title: Xingu Indigenous Reserve

Project Purpose: Improving the ability of local communities to protect the indigenous reserve from fires.

Project Partner: Alianca da Terra and IPAM

Budget: £4,665

2. Project Title: Building links for co-operation on long distance energy transmission

Project Purpose: To explore opportunities for joint UK-Brazil research and commercial activities on long distance energy transmission and to identify potential ways to increase the proportion of renewables in the energy mix.

Project Partner: British Embassy / Ministry of Mines and Energy

Budget: £9,996

3. Project Title: Marine energy exchange

Project Purpose: To build knowledge in UK and Brazil of tidal energy technologies and to strengthen co-operation in this area.

Project Partner: British Embassy / COPPE, University of Rio de Janeiro

Budget: £7,652

Total: £22,313

FY 2010/11

1. Project Title: Biochar Conference

Project Purpose: Biochar Conference on carbon emissions reduction.

Project Partner: British Consulate General, Sao Paulo / EMBRAPA

Budget: £7,000

2. Project Title: Green Economy Collaboration

Project Purpose: Increase research and commercial collaboration around Green Economy initiatives.

Project Partner: British Consulate General, Sao Paulo / Environment Secretariat, Sao Paulo state

Budget: £6,000

Total: 13,000

Canada

Strategic Programme Fund (SPF)

FY 2009/10

1. Project Title: Facilitating large-scale demonstration of Carbon Capture and Storage in Canada

Project Purpose: To put policy and regulatory frameworks in place to enable construction of 3-5 commercial-scale demonstration plants in Canada storing 5 MT of CO2 per year by 2015

Budget: £16,440

2. Project Title: Canada Emissions Trading

Project Purpose: Launch of emissions trading scheme in British Columbia, which creates an ambitious and compatible model, which is then fed into the development of the Federal ETS

Project Partner: British Columbia Government

FY09-10 Spend: £9,448.95

Total: £25,888.95

FY 2010/11

1. Project Title: Facilitating large-scale demonstration of Carbon Capture and Storage in Canada

Project Purpose: To put policy and regulatory frameworks in place to enable construction of 3-5 commercial-scale demonstration plants in Canada storing 5 MT of CO2 per year by 2015

Budget: £13,844

2. Project Title: Canada Emissions Trading

Project Purpose: Launch of emissions trading scheme in British Columbia, which creates an ambitious and compatible model, which is then fed into the development of the Federal ETS

Project Partner: British Columbia Government

FY10-11 Spend: £81,780.50

Total: £95,624.50

Bilateral Programme Budget (BPB)

FY 2009/10

1. Project Title: Thought Forum event

Project Purpose: Organisation of an event to highlight energy efficiency and renewable technology opportunities for selected participants including production of briefing papers, invitations, venue & logistics

Project Partner: Pembina Institute

Budget: £8,987

Total: £8,987

FY 2010/11

1. Project Title: Green Jobs Report

Project Purpose: To research, produce and prepare material for public release on green jobs in Canada.

Project Partner: Pembina Institute

Budget: £8,827

2. Project Title: Industry/ENGO Dialogue

Project Purpose: To provide facilitation and coordination of an industry/ENGO representatives dialogue on Canadian Energy and climate policy.

Project Partner: Pembina Institute

Budget: £6,454

3. Project Title: Canadians working for climate solutions

Project Purpose: To identify key audiences in Canada that have ethnic or cultural ties to countries most vulnerable to the effects of climate change, and build an effective engagement campaign to mobilize and educate these populations to become advocates in the drive for climate change solutions.

Project Partner: David Suzuki Foundation

Budget: £20,000

Total: £35,281

China

Strategic Programme Fund (SPF)

Climate Change

Including capacity building at city and provincial level, supporting businesses to measure emissions, reducing emissions from heavy sectors, green finance and investment

FY 2009-10: £2,555,271

FY 2010-11: £2,385,796

Clean Energy

Including supporting policy and financial frameworks for clean energy, e.g. Carbon Capture and Storage, and improving quality of data management.

FY 2009-10:£542,535

FY 2010-11:£742,784

Renewables

Including accelerating research, development and deployment of technologies, mitigation of emissions.

FY 2009-10:£259,101

FY 2010-11: £263,000

Bilateral Programme Budget (BPB)

Climate Change

FY 2009-10: £6,305

FY 2010-11: £48,237

Energy (Carbon Capture and Storage development)

FY 2009-10: £12,200

FY 2010-11: £3,318

India

Strategic Programme Fund (SPF)

FY 2009/10

1. Project Title: Capture-ready design India

Project Purpose: This project provided support to Reliance to develop a CO2 capture-ready design for the Sasan and Krishnapatnam Ultra Mega Power Projects in India – providing leadership on CCS to the Indian.

Project Partner: Mott Mc Donalds, India

Budget: £14,860

2. Project Title: Developing clean energy action

Project Purpose: To develop State Level Action Plans for the systemic deployment of clean energy sources across all sectors in major states of the country for Climate Mitigation.

Project Partner: World Institute for Sustainable Energy, India

Budget: £80,968.90

3. Project Title: Clean energy markets

Project Purpose: Accelerating clean energy markets and facilitating clean energy enterprises in India.

Project Partner: Confederation of Indian Industries, World Resources Institute

Budget: £153,657

4. Project Title: Scaling up renewable energy in India

Project Purpose: To provide a high quality evidence-base for a major Indian Solar / Off-grid Renewable Energy Fund; the analysis to be used by the FCO to achieve commitment from Government of India and other financiers as appropriate to establish such a Fund.

Project Partner: NERA Consulting UK

Budget: £77,055

5. Project Title: Design of Renewable Energy Credit System for India

Project Purpose: To design a pilot implementable Renewable Energy Credit Trading and Tracking System in consultation with key stake holders for greater uptake of renewable electricity production across whole of India.

Project Partner: The Energy and Research Institute India

Budget: £28,295

6. Project Title: Greenhouse gas mitigation by renewables

Project Purpose: Increase uptake of "programme of activities CDM (Clean Development Mechanism" (PoA-CDM) in India for country programmes/activities by developing and testing a framework for renewable energy programme/activities in rural energy sector under PoA.

Project Partner: Delloitte India

Budget: £54,193

7. Project Title: India transport mobility

Project Purpose: Ministry of Urban Development (MoUD) will adopt and implement guidelines to enable the implementation of successful low carbon mobility bus systems into its National Urban Transport Policy frame work.

Project Partner: EMBARQ India

Budget: £30,285

8. Project Title: India government energy efficiency process

Project Purpose: Adoption of guidelines and decision making tools by Government of India for procurement of Energy Efficient products

Project Partner: PricewaterhouseCoopers, India

Budget: £85,712.31

9. Project Title: India CC & Doing Business

Project Purpose: Increased number of investors and other companies undertake voluntary disclosure of greenhouse gas emissions and emission reduction actions.

Project Partner: Confederation of Indian Industries, World Wildlife Fund, Carbon Disclosure Project

Budget: £52,430.12

10. Project Title: Analysis of the potential of Mandatory Trading in energy saving certificates to drive energy efficiency in the Indian industrial sector

Project Purpose: Establishment of an effective Mandatory Trading scheme in energy saving certificates in India

Project Partner: CAMCO UK and Confederation of Indian Industries

Budget: £67,115

11. Project Title: Analysis of the potential of a Voluntary trading program to deepen and/or broaden the proposed Indian Mandatory energy saving certificates market

Project Purpose: Establish an effective Voluntary Trading scheme in energy saving certificates that is complimentary to (i.e. either deepens and / or broadens) the proposed Mandatory trading scheme in India.

Project Partner: CAMCO UK and Confederation of Indian Industries

Budget: £62,727

12. Project Title: Use of IT as tool to enhance adaptive capacities of farming communities India Devolved Funds

Project Partner: The Energy and Research Institute India

Budget: £1,522.52

13. Project Title: Mapping of Carbon Capture and Storage (CCS) activities in India to promote R&D initiatives

Project Partner: IRADE India

Budget: £1,860.27

14. Project Title: Climate Protection and Energy Security through Positive Action in 4 Indian Cities involving Local Authorities / Governments

Project Purpose: To create a comprehensive city action plan to reduce carbon emissions and achieve energy efficiency in two cities.

Project Partner: ICLEI India

Budget: £21,942.31

15. Project Title: Climate Leaders initiative

Project Purpose: The purpose of this project is to build a responsive and representative network of Climate leaders to ensure that national policy makers are informed of regional climate change priorities in two regions which can be used as a model for other regions in India and countries in South Asia.

Project Partner: LEAD India

Budget: £46,914.28

16. Project Title: Standard and Labelling

Project Purpose: To facilitate and develop labels and minimum energy performance standards for washing machines in India.

Project Partner: PricewaterhouseCoopers, India

Budget: £90,995

17. Project Title: Roadmap of South Asian cities

Project Purpose: Supporting South Asian local governments to understand contribution of city level carbon emissions and developing regional consensus on local action plans to address climate change issues and networking them to contribute to the post 2012 international negotiation processes on Climate Change.

Project Partner: ICLEI India

Budget: £102,565.55

18. Project Title: Energy Efficiency in buildings

Project Purpose: Local capacity building for achieving energy performance in existing private commercial building in India.

Project Partner: ICF International

Budget: £1,720

19. India Devolved Funds (Tactical Fund)

Project Purpose: Activities in support of the above projects (bringing additional speakers to the events, publications, additional seminars to support the sustainability of the projects)

Project Partner: Climate Change Unit- British High Commission

Budget: £27,241.23

Total: £1,002,059.40

FY 2010/11

1. Project Title: Developing clean energy action

Project Purpose: To develop State Level Action Plans for the systemic deployment of clean energy sources across all sectors in major states of the country for Climate Mitigation.

Project Partner: World Institute for Sustainable Energy, India

Budget: £23,393.03

2. Project Title: Clean energy markets

Project Purpose: Accelerating clean energy markets and facilitating clean energy enterprises in India.

Project Partner: Confederation of Indian Industries, World Resources Institute

Budget: £91,160

3. Project Title: Scaling up renewable energy in India

Project Purpose: The overall purpose of the project was to provide a high quality evidence-base, developed through stakeholder engagement, and evaluation of design options for a major Indian Solar / Off-grid Renewable Energy Fund; the analysis will be used by the FCO to achieve commitment by March 2011 from Government of India and other financiers as appropriate to establish such a Fund.

Project Partner: NERA Consulting UK

Budget: £32,348

4. Project Title: Parliamentary Action for Promoting Renewable Energy and Mitigating Climate Change

Project Purpose: Government of India to publicly announce the adoption of a national policy to increase the share of renewable energy in total electricity generation to a minimum of 15 per cent by 2032

Project Partner: E-Parliament India

Budget: £56,591.56

5. Project Title: India transport mobility

Project Purpose: Ministry of Urban Development (MoUD) to adopt guidelines to enable the implementation of successful low carbon mobility bus systems into its National Urban Transport Policy frame work

Project Partner: EMBARQ India

Budget: £116,957

6. Project Title: India govt energy efficiency process

Project Purpose: Adoption of guidelines and decision making tools by Government of India for procurement of Energy Efficient products

Project Partner: Price Water House Coopers, India

Budget: £130,197.35

7. Project Title: India CC & Doing Business

Project Purpose: Increased number of investors and other companies undertake voluntary disclosure of greenhouse gas emissions and emission reduction actions.

Project Partner: Confederation of Indian Industries, World Wildlife Fund, Carbon Disclosure Project

Budget: £57,041.18

8. Project Title: Analysis of the potential of Mandatory Trading in energy saving certificates to drive energy efficiency in the Indian industrial sector

Project Purpose: Establishment of an effective Mandatory Trading scheme in energy saving certificates in India

Project Partner: CAMCO UK and Confederation of Indian Industries

Budget: £34,034

9. Project Title: Analysis of the potential of a Voluntary trading program to deepen and/or broaden the proposed Indian Mandatory energy saving certificates market

Project Purpose: Establish an effective Voluntary Trading scheme in energy saving certificates that is complimentary to (i.e. either deepens and / or broadens) the proposed Mandatory trading scheme in India

Project Partner: CAMCO UK and Confederation of Indian Industries

Budget: £36,730

10. Project Title: Aviation Climate Leadership Initiative

Project Purpose: At least 5 Indian airline operators, accounting for at least 35% domestic market share (in terms of passenger-km of activity per week), to publicly adopt a roadmap towards low carbon operations, at least one Indian airline to join the Aviation Global Deal group, and all Indian airlines flying into the EU publicly adopt a strategy for effective compliance with the EU ETS, with the Government of India Ministry of Civil Aviation publicly welcoming the Indian aviation industry's leadership on climate change.

Project Partner: First Climate India

Budget: £84,596.26

11. Project Title: Roadmap of South Asian cities

Project Purpose: Supporting South Asian local governments to understand contribution of city level carbon emissions and developing regional consensus on local action plans to address climate change issues and networking them to contribute to the post 2012 international negotiation processes on Climate Change.

Project Partner: ICLEI India

Budget: £4,063.21

12. India Devolved Funds (Tactical Fund)

Project Purpose: Activities in support of the above projects (bringing additional speakers to the events, publications, additional seminars to support the sustainability of the projects)

Project Partner: Climate Change Unit- British High Commission

Budget: £8,236

Total: £675,347.59

Bilateral Programme Budget (BPB)

FY 2009/10

1. Project Title: Sponsored visit of Indian Innovation policy maker to the UK

Project Purpose: The visit served as a platform to promote UK excellence to the key innovation policy maker in India and to inform UK policy making both domestic and international. Improved relationship and traction with the Department of Science & Technology, Government of India.

Project Partner: Science and Innovation Network (SIN), BHC, New Delhi

Budget: £3,753

2. Project Title: Promoting Climate Change issues using the BHC, Delhi Façade

Project Purpose: Utilising the exterior boundary wall of the British High Commission building in New Delhi to promote & create awareness of climate change. This was a public awareness-raising project on climate change. The poster, depicting green initiatives by the Delhi Government, was made from environmentally friendly material. The location was a strategic choice as it faced the official hotel for the Commonwealth Games and several high-profile government events, as well as a hub for media activity. The poster was formally unveiled by the Delhi Chief Minister on World Environment Day, generating much media interest. Media interest continued for 6 months after it was put up, and a video has been uploaded on Youtube.

Project Partner: Public Diplomacy & Marketing Team, BHC, New Delhi

Budget: £763

3. Project Title: Support for UK Nuclear Research Community to implement Strategic Partnerships agreed with the Bhabha Atomic Research Centre

Project Purpose: UK research community gains access to data and expert scientists in areas where (a) our knowledge has eroded or become obsolete and (b) India has particular research strengths, such as the use of Thorium as a nuclear fuel, thereby supporting the UK's nuclear renaissance and our low-carbon energy agenda

Project Partner: Science and Innovation Network (SIN), BHC, New Delhi

Budget: £25,911

4. Project Title: UK Environment Film Fellowships 2010

Project Purpose: Use specially commissioned films to persuade key influencers and key target groups to take action on climate changes' impacts in India. The specific area for Films is being discussed with the policy leads at CCEU and British Council.

Project Partner: Public Diplomacy & Marketing Team, Press & Communication Dept., BHC, New Delhi

Budget: £26,202

Total: £56,629

FY 2010/11

1. Project Title: Capacity building workshop for the government officials in Maharashtra in the area of climate change mitigation and adaptation

Project Purpose: By January 2011, key statelevel policy makers are aware of impact of climate change on Maharashtra and are capable of undertaking appropriate mitigation & adaptation measures and contributing to development of robust state level action plan on climate change (SAPCC) for Maharashtra.

Project Partner: CCEU, British Deputy High Commission, Mumbai

Budget: £8,126

2. Project Title: Media: Facing the Climate Challenge

Project Purpose: To expose and train journalists from Eastern region and North-East India on Climate Change and Energy issues beyond Copenhagen dialogue to help them understand the challenge of Climate Change and help them produce more informative and in-depth reporting in the future.

Project Partner: British Deputy High Commission, Kolkata

Budget: £11,600

Total: £19,726

Russia

Strategic Programme Fund (SPF)

FY 2009/10

1. Project title: Bali Roadmap for Russia: Macroeconomic assessment of policy options to reduce post-2012 carbon emissions.

Project purpose: To provide key Russian policy-makers with the economic analysis and policy options necessary to properly inform Russia's national, long-term, post 2012 emissions reduction strategy (consistent with the overall Annex I Parties' goal of 25-40% emissions reduction by 2020).

2. Project title: Better data for better energy efficiency indicators and better energy efficiency policy effectiveness

Project purpose: To introduce energy efficiency indicators for Russia through better statistics collection, as a key part of effective energy policy formulation

3. Project title: Climate change strategies for Russian cities

Project purpose: Russian cities reduce their contributions towards climate change and adapt to its impacts using enhanced knowledge and strategies that are developed using Moscow as a model city.

4. Project title: Russia Business Support

Project purpose: Leading Russian businesses in key industries understand the economic and financial opportunities and benefits of low carbon development for Russia and by October 2009 present the Government with a paper setting out the industry position with regard to an ambitious post-2012 agreement on climate change in advance of UNFCCC conference in Copenhagen (7-18 December 2009) and continuing engagement thereafter.

5. Project title: Development of Sustainable Energy and Investment Training Programme for the Power Generation and Power Consuming Sector

Project purpose: Development of Sustainable Energy and Investment Training Programme for the Energy Sector in Russia to foster public and private sector investment in low carbon technologies projects, to assist Russian regional governments to develop appropriate policy frameworks and incentives to adopt and implement the Kyoto mechanisms including the post 2012 period.

6. Project title: Russian economic development: Copenhagen and beyond

Project purpose: In advance of UNFCCC COP 15 to provide a sound economic analysis of the potential for green house gas emission reductions in key economic sectors and nationally.

7. Project title: UK-Russia Climate Change Science collaboration

Project purpose: To improve understanding of climate change impacts (physical and economic) on Russia and the link between sound climate security science and policy-making.

8. Tactical Fund: Activities in support of the above projects (bringing additional speakers to the events, publications, additional seminars to support the sustainability of the projects)

Total Project spend 2009/10 = £671,515

FY 2010/11

1. Project title: Carbon Market Development in Russia

Project Purpose: By March 2012 policy options for implementing internal emission trading schemes are presented by the Ministry of Economic Development to the Russian Government.

2. Project title: Creating the Framework for Russian Regional Low Carbon Development

Project Purpose: By 2012 Sverdlovsk Region Adopts a Low Carbon Strategy.

3. Project title: Identification and elimination of administrative barriers for energy-saving

Project Purpose: Identifying and eliminating administrative barriers hampering the development of the power saving sector.

4. Project title: Improving estimates of forest carbon measurements

Project Purpose: By September 2011, Russian annual greenhouse gas inventory and national communication submissions to the UNFCCC are based on more accurate, state-of-the-art activity-based methodology for projecting net carbon fluxes in Russia's managed forests.

5. Project title: Strengthening Russia's greenhouse gas emission accounting and projecting system

Project Purpose: By March 2011 the Russian government uses the advanced tools for greenhouse gas emission inventory and sectoral projections based on IPCC best practices.

6. Project title: The Development of Fiscal Measures to Stimulate Energy Efficiency

Project Purpose: By April 2011, the Russian Ministry of Finance adopts fiscal measures to promote energy efficiency in Russia.

7. Project title: UK-Russia Climate Change Science collaboration

Project Purpose: The aim of this project is to bring climate security up the Russian Government's agenda by improving:- understanding of climate change impacts (physical and economic) on Russia;- the link between sound climate security science and policy-making.

8. Tactical Fund: Activities in support of the above projects (bringing additional speakers to the events, publications, additional seminars to support the sustainability of the projects).

Total Project spend 2010/11 = £553,795

Bilateral Programme Budget (BPB)

FY2009/10

1. Project title: Increasing business participation in energy, climate change and trade and investment policy in the Russian Federation.

Project Purpose: To foster a closer working relationship between senior policy staff and membership of the most influential business lobbies in the UK and Russia (RSPP and CBI) in the fields of energy efficiency, climate change and global trade and investment policy, initially via the exchange of expert visits and subsequently via CBI/RSPP seminars/working groups. (1st year)

2. Project title: Renewable energy development in the Baltic Sea Region

Project Purpose: To promote initiatives for renewable energy development in the region of the Baltic Sea which will be a foundation for a new regional energy policy

3. Project title: Climate exhibition and discussion tour to 2 regions

Project Purpose: To raise awareness of general public and promote low carbon economy through a climate change photo exhibition and public debate in two regions - St.Petersburg and Ekaterinburg.

Total Project spend 2009/10: £67,763

FY 2010/11

1. Project title: Increasing business participation in energy, climate change and trade and investment policy in the Russian Federation.

Project Purpose: To foster a closer working relationship between senior policy staff and membership of the most influential business lobbies in the UK and Russia (RSPP and CBI) in the fields of energy efficiency, climate change and global trade and investment policy, initially via the exchange of expert visits and subsequently via CBI/RSPP seminars/working groups. (2nd year)

2. Sponsored Visit: Presentation by UK experts at the SPF conference 'Market based mechanisms as a key element of Russian climate policy'

3. Sponsored Visit: Participation of UK experts from forestry Commission in All-Russia Conference.

4. Sponsored Visit: Visit of Carbon Trust to Moscow and Ekaterinburg: to share best practice in energy efficiency and carbon management, including through meetings with policymakers, regional government and business groups.

5. Project title: Enhancing energy efficiency and climate policies in Russia: from regional to federal level.

Project Purpose: Enhanced knowledge of energy efficiency and climate change policy development in Russia on both regional and federal levels aiming at policy making on commitments and use of flexibility mechanisms in the international post-2012 climate change regime.

6. Conference "Ecological Urbanism: Sustainable and Energy Efficient Approach in Urban Architecture": Increased competitiveness of British business on Russian market, achieved by strengthened awareness among Russian stakeholders about benefits of what sustainable and energy efficient approach in urban infrastructure brings in, and what Britain may offer in this sphere.

Total Project spend 2010/11: £32,036

USA

Strategic Programme Fund (SPF)

FY 2009/10

1. Project Title: development and harmonisation of regional carbon capture and storage policy support mechanisms.

Project Purpose: Build consensus on, and develop enabling policy mechanisms and regulatory frameworks to, facilitate carbon capture and storage (CCS) in key Western U.S. states (currently Colorado, Wyoming and Montana).

Project Partner: Camco

Budget: £26,656

2. Project Title: Climate-related pressures UK, USA, China

Project Purpose: US, UK and Chinese security communities recognise the security implications of climate change and act as a driver of innovative solutions to reduce greenhouse gas emissions.

Project Partner: CNA/RUSI

Budget: £181,386

4. Project Title: Emissions Trading Consultant

Project Purpose: 1) Ensure that the regional schemes are of high quality, incorporate EU lessons learned, are supported by state legislatures, and can be linked to the international system. 2) State legislators show increased support for a federal emission trading system and lobby in favour of a Federal vote.

Project Partner: Washington Embassy, Boston and San Francisco consulates

Budget: £3,824

5. Project Title: Influencing climate security policy and legislation in Texas

Project Purpose: To gain widespread acceptance among key policymakers of the science of climate change and the need for urgent action, thus moving Texas from a state of denial and inaction to one of acceptance and effective action on this issue.

Project Partner: Environmental Defense

Budget: £13,673

6. Project Title: Changing US climate policy: Giving state legislators better economic arguments for lowering emissions

Project Purpose: To accelerate state-level actions to reduce greenhouse gas emissions in the US by improving state legislators' understanding of the economic benefits of a low carbon economy, and their capacity to demonstrate those gains to their constituents and colleagues.

Project Partner: National Caucus of Environmental Legislators

Budget: £95,725

7. Project Title: Moving constituencies

Project Purpose: Influencing key decision makers to embrace a positive U.S. role on the international climate stage.

Project Partner: World Resource Institute

Budget: £68,589

Total: £389,853

FY 2010/11

1. Project Title: Climate-related pressures UK, USA, China

Project Purpose: US, UK and Chinese security communities recognise the security implications of climate change and act as a driver of innovative solutions to reduce greenhouse gas emissions

Project Partner: CNA/RUSI

Budget: £1,000

2. Project Title: Changing US climate policy: Giving state legislators better economic arguments for lowering emissions

Project Purpose: To accelerate state-level actions to reduce greenhouse gas emissions in the US by improving state legislators' understanding of the economic benefits of a low carbon economy, and their capacity to demonstrate those gains to their constituents and colleagues.

Project Partner: National Caucus of Environmental Legislators

Budget: £30,570

3. Project Title: Moving constituencies

Project Purpose: Moving Constituencies for a Positive U.S. Role on the International Climate Stage.

Project Partner: World Resource Institute

Budget: £21,449

Total: £53,019

Bilateral Programme Budget (BPB)

FY 2009/10

1. Project Title: US-EU Environmental Media Summit Stockholm

Project Purpose: To give U.S. and UK/European environmental journalists a better understanding of climate change issues and government priorities as a result of a best practice exchange.

Project Partner: Center for Strategic and International Studies (CSIS)

Budget: £13,755

2. Project Title: International Climate solutions Conference

Project Purpose: The International Climate Solutions Conference will aim to reshape perceptions that serve as barriers to climate policy in North Dakota.

Project Partner: The Great Plains Institute for Sustainable Development, Inc.

Budget: £22,754

3. Project Title: Prosperity and Carbon Capture and Storage (CCS) CODEL

Project Purpose: Influence thinking on incentivizing the transition to a low carbon economy and the development of renewable energy projects in the US.

Project Partner: British Embassy in partnership with; No. 10/Cabinet Office, FCO Ministers, DECC/BIS Ministers, Members of Parliament, Confederation of British Industries, Renewables UK, Energy Companies (offshore wind, CCS, nuclear) e.g. Scottish Power

Budget: £21,882

4. Project Title: Local Governments and Climate Change: A Southeast Regional Workshop

Project Purpose: Educate local Governments in the Southwest on ways to achieve greenhouse gas reductions, through a workshop that highlights UK local leadership on climate change.

Project Partner: International Council for Local Environmental Initiatives (ICLEI)

Budget: £7,871

Total: £66,262

FY 2010/11

1. Project Title: CODEL-Clean Energy

Project Purpose: Influence thinking on incentivizing the transition to a low carbon economy and the development of renewable energy projects in the US.

Project Partner: British Embassy Washington

Budget: £7,852

2. Project Title: Bioenergy research

Project Purpose: To accelerate progress towards development of low carbon transport fuels from biomass, and to strengthen the UK biofuels research sector through increased UK-US dialogue and collaboration.

Project Partner: Consul General San Francisco in partnership with DoE NREL and Welsh universities

Budget: £5,500

3. Project Title: Sustainable Energy Management

Project Purpose: To share best practice on sustainable energy management in built environments in the UK and US with a view to shaping future research collaborations and ultimately influencing policy practice.

Project Partner: CG Houston in partnership with University College London (GO-Science Foresight Team). NREL (National Renewable Energy Laboratory) and other university/government contacts identified by SIN-Houston.

Budget: £18,000

4. Project Title: Nuclear Workshop - Young Engineers and Scientists Symposium 2011: Alternative Energies

Project Purpose: To explore synergies between French, US and UK nuclear and renewable energy researchers with a view to sharing expertise, leading research and technical work for future collaborative projects, focusing on the next generation of scientists to shape careers as they develop.

Project Partner: CG Houston in partnership with Texas A&M

Budget: £18,800

5. Project Title: UK Offshore Wind Experts: East Coast Visit

Project Purpose: To showcase UK OSW policy, technology and industry to key US and Canadian federal and state stakeholders, which will influence them to accelerate their own domestic OSW programmes, bringing environmental and economic/commercial benefits (to US and UK).

Project Partner: Project implemented by the US & Canadian network - UK stakeholders including DECC, ORED, FCO, MOD, Crown Estates & National Grid.

Budget: £25,850

6. Project Title: Off-Shore Wind (OSW) Visit to the UK

Project Purpose: Building on the successful US Offshore Wind policy makers visit to the UK in October, this project would sustain momentum for the US deployment of offshore wind; strengthen US-UK RD&D (Research Development and Deployment) collaboration in the clean energy arena; and showcase British industry strength in the offshore wind space, i.e. fulfil policy and commercial priorities for several HMG partners in close collaboration with US Government.

Project Partner: Project implemented by the US & Canadian network - UK stakeholders including DECC, ORED, FCO, MOD, Crown Estates & National Grid.

Budget: £25,000

7. Project Title: Offshore Wind Development

Project Purpose: UK participation in the Southeast offshore wind meetings will foster the UK and US relationship in renewable energy production leading to improved policies in the region and further UK business opportunities through development of facilities in the Southeast US.

Project Partner: Project implemented by CG Altanta - UK Stakeholders, NAREC, Carbon Trust and CBI

Budget: £4,000

Total: £105,002
